

How to Make Cascarones

Materials

- Eggs (as many as you need)
- Toothpick
- Food coloring
- Vinegar
- Clear glue or Mod Podge
- Tissue paper
- Confetti

Instructions

1. Use a needle to poke a small hole on the top of the egg. Poke a second, but larger, hole on the bottom of the egg.
2. Blow air through the small hole to force the yolk out.
3. Rinse out the eggshells and allow them to dry.
4. Boil 1/2 cup of water with a teaspoon of vinegar. Pour water into a small bowl and add 8-10 drops of food coloring. Do this for each color.
5. Use a wire whisk to dip the egg into the dye for at least 5 minutes. Remove the egg and allow it to dry.
6. Use a paper funnel or small spoon to fill the eggshell with confetti.
7. Glue a small round piece of tissue paper to seal the larger hole.
8. You can also decorate the eggs with stickers, glitter or other embellishments.
